

War and Peace, part I by L. Tolstoy

Two parts of War and Peace are frequently presented together, especially in the electronic format. The standard division is that Books 1—8 belong to the first part. The second part starts with the French invasion of Russia (1812), and involves Books 9—15, First Epilogue and Second Epilogue.

For every method (LUHN, YAKE, and our method) we extracted 370 words. For YAKE and our method the actual number of words is larger; see below. Among those 370 words for each method, human experts selected keywords of the text that are colored green. The selected keywords were counted, red numbers indicate on the running count. LUHN, YAKE and our method identified 84, 84 and 159 keywords, respectively. For our situation those 370 words were divided equally between local and global potential keywords.

OUR METHOD. GLOBAL KEYWORDS, STRONG CASES (criterion $A < 1/5$ in the paper).
