

War and Peace, part II by L. Tolstoy

Two parts of War and Peace are frequently presented together, especially in the electronic format. The standard division is that Books 1—8 belong to the first part. The second part starts with the French invasion of Russia (1812), and involves Books 9—15, First Epilogue and Second Epilogue.

For every method (LUHN, YAKE, and our method) we extracted 284 words. For YAKE and our method the actual number of words is larger; see below. Our method overall extracted 791 words. Among those 284 words for each method, human experts selected keywords of the text that are colored green. The selected keywords were counted, red numbers indicate on the running count. LUHN, YAKE and our method identified 80, 74 and 145 keywords, respectively. For our situation those 284 words were divided equally between local and global potential keywords.
